MEND GROUP (PTY) LTD

SOFTWARE DEVELOPMENT · MASERU, LESOTHO

Capability statement
October 2026
mendgroup.co.za

A Lesotho-registered software company. We build web and mobile systems for businesses, and our own platforms in Sesotho and English, built to keep working offline on low-cost phones. Every system below can be opened at the address given.

DELIVERED WORK YOU CAN CHECK

TM Stone Solutions (PTY) LTD Paving manufacturer, Maseru CLIENT
Company website, an instant quote calculator that prices a job from the company's own price list, and an owner back-office for quotes, jobs, sales, reports and staff records, built offline-first for a phone.
jakote.github.io/tm-stone-preview

Philalink Mobile mechanic booking platform CLIENT
Customers choose vehicle and services and see the price before they book; separate signed-in areas for customers, mechanics and administrators; location pages. Built to a fixed scope, deployed on the client's own domain.
michanic.velangaye.co.za

Mafisa, Pitso and Matsema MEND community platforms PILOT
Equipment lending (a bakkie, a tractor, a mixer) with ownership proof checked; skilled trades found, engaged and rated; small producers pooling supply. One shared identity, verification and reputation system with a tamper-evident record. Sesotho and English, installable, built to work offline. Records agreements, never holds or moves money. Running on sample data; no users yet.

CAPABILITIES

- **Software development:** web applications, installable phone apps (PWAs), APIs and PostgreSQL databases; Python, JavaScript and TypeScript, Go.
- **Cloud and hosting:** deployment, domains, DNS, business email routing and managed PostgreSQL on free or low-cost tiers.
- **IT consulting:** turning a business's own prices and processes into a working system: costing and quoting, booking, record-keeping.
- **Security and data protection:** row-level security on every table, secret keys kept out of phone code, data export and erasure designed in, automated checks on every change.
- **Local language, low-cost phones:** Sesotho and English interfaces, offline-first apps, light pages for expensive mobile data.
- **Data and automation:** pipelines, scheduled jobs and analysis.

KEY PERSON

Jakote Lejaha, Founder and Managing Director. Software engineer with seven years of building production software: backend services, APIs and integrations, and the automated tests and deployment pipelines around them. BCom Honours in Information Technology Management (2022).

HOW WE DELIVER

1. **Scope in writing:** each phase has a written scope and a fixed price, agreed before work starts.
2. **Milestones you can open:** delivered to a live address you can check on your phone.
3. **Checked before you see it:** automated tests and a check at phone width before each release.
4. **Handover:** your domain, your accounts, your data, with written setup and handover notes.

WHAT IS DIFFERENT

- Built in Sesotho and English from the start.
- Offline-first for low-cost Android phones and expensive data.
- The person who scopes the work is the person who builds it.
