MEND GROUP (PTY) LTD

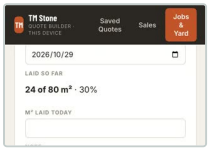

SOFTWARE DEVELOPMENT · MASERU, LESOTHO

Capability statement
October 2026
mendgroup.co.za

A Lesotho-registered software company. We build web and phone systems for businesses, and our own platforms in Sesotho and English that keep working offline on low-cost phones. Each project below links to a case study with screenshots.

WORK

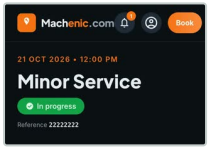

TM Stone Solutions (PTY) LTD — Paving manufacturer, Maseru

CLIENT · PRIVATE PREVIEW

- Website with a calculator that prices a paving job from the published price list and sends it on WhatsApp with the paver, area and price filled in.
- Then the owner's back-office for a phone, in four phases: quotes and costing; jobs, production and crew dates; stock and supplier orders; invoices and payments. Works offline; two phones share the same records.
- 13 automated test suites. Back-office built and tested, not yet in daily use.

Philalink — Mobile mechanic booking platform

CLIENT · DELIVERED

- Customers book a mechanic to their door and see the total before they confirm.
- A booking goes to the nearest free mechanic within 50 km; the customer follows them on a live map.
- Separate areas for customers, mechanics and the office; email notifications; inspection checklists and quotes.
- Delivered and running on the client's own domain. 32 automated tests.

mendgroup.co.za/work/philalink

Mafisa, Pitso and Matsema — MEND community platforms

PILOT

- Lend equipment with ownership checked; find a trade for one job and rate it; pool supply from small producers for one large order.
- One shared identity, document-check and reputation system with an append-only record. Sesotho and English, installable, works offline.
- Records agreements; never holds or moves money. Running on sample data. No users yet.

KEY PERSON

Jakote Lejaha, Founder and Managing Director. Software engineer with seven years of building production software: backend services, APIs and integrations, and the automated tests and deployment pipelines around them. BCom Honours in Information Technology Management (2022).

CAPABILITIES

- **Software:** web apps, installable phone apps, APIs, PostgreSQL; Python, JavaScript, TypeScript, Go.
- **Cloud and hosting:** deployment, domains, DNS, email routing, managed PostgreSQL on low-cost tiers.
- **Business systems:** a company's own prices and processes turned into quoting, costing, booking and records.
- **Data protection:** row-level security, data export and erasure, automated tests before release.
- **Sesotho and English**, offline-first, light pages.

HOW WE DELIVER

1. Phases, each on a live address you can open on your phone.
2. Tested at phone width before you see it.
3. Your domain, your accounts, your data, with written handover notes.
